

1. Product Scope

Core Features:

- Multi-school management
- Role-based access (Admin, Tutor, Student)
- Bulk student import
- Video lesson upload by module
- One-time and expirable lesson links
- Embedded video playback
- Assignment submission (audio/video)
- Tutor grading workflow
- In-app notifications
- Reporting dashboard
- Build-and-handover friendly architecture

2. Role Permissions

Admin:

- Create schools
- Manage tutors/students
- Create modules and lessons
- Upload lesson video
- Generate links
- Assign graders
- View reports

Tutor:

- View assigned schools/modules
- Review submissions
- Grade assignments
- Send feedback

Student:

- View lessons
- Watch videos
- Submit assignment responses
- View grades and notifications

3. Development Phases

Phase 1: Architecture & Database

Phase 2: Authentication & RBAC

Phase 3: School Management

Phase 4: Video Library & Uploads

Phase 5: Secure Link System

Phase 6: Assignment Submission

Phase 7: Grading Workflow

Phase 8: Notifications

Phase 9: Reporting

Phase 10: Testing, Deployment, Handover

4. Security Guardrails

- Expirable lesson links
- One-time access tokens
- File type validation
- Upload size limits for assignment submission
- Audit logging
- Role-Based-Access-Control enforcement
- Secure password

5. Build-and-Handover Deliverables

- Full source code
- MySQL schema
- Admin manual
- Tutor manual
- Student manual

6. Timeline

Phase	Duration
Requirements & Architecture	1 week
Backend Development	1 week
Frontend Development	2 weeks
Testing & Hardening	1 week
Documentation & Handover	1 week
Total	6 weeks
